

Prompt for 5 gallons (Neel, with this one you don't need a reference photo after the first time you do it in the chat!

Retouch this product photo to a high-end studio e-commerce standard. Keep the container's exact shape, size, proportions, cap, embossing, label artwork, logo, and ALL text completely unchanged. Do not redraw, restyle, or rewrite the label.

CRITICAL COLOR RULE: Do not change the hue of the liquid. Whatever color the liquid is in this photo, keep that exact same color. If it is red, keep it red.

If it is blue, keep it blue. If it is yellow, keep it yellow. You may only make that existing color cleaner, richer, and more luminous — never shift it toward a different color. Same goes for the cap and label colors: preserve every hue exactly as shown.

Apply this lighting and finish:

- Clean studio softbox lighting with soft vertical specular highlights running down the glossy plastic and gentle falloff. No harsh hotspots, no flat dull light.
- Make the liquid read as luminous and translucent, lit from within, deepening and saturating its OWN existing color only.
- Pure seamless white studio backdrop. Add a soft contact shadow under the container and a faint reflection at its base.
- Remove any milky glare or haze across the label so blacks read true-black and all text is crisp and fully legible — but keep the label design and colors as-is.
- High overall sharpness, clarity, and contrast at professional product-photo quality, shot straight-on at the same angle and framing as the input.

Output one photorealistic studio product shot.
